EDUCATION

Kalinga Institute of Industrial Technology

Bachelor of Technology, Computer Science and Communication Engineering, **CGPA- 9.41**

Bhubaneswar, India

2023-2027

Little Flower School

Senior secondary ICSE – 92%

Jamshedpur, India

2022-2023

Little Flower School

Secondary ICSE – 96.8%

Jamshedpur, India

2020-2021

EXPERIENCE

Software Development Engineer Intern | Flipkart

Bengaluru, India

May 2026 – Jun 2026

Project: Unused Metrics Detector – Eliminating Dead Metrics to Reduce Observability Storage Costs

- Designed and developed an automated solution to identify unused and inactive metrics across the observability ecosystem.
- Analyzed metric usage patterns from monitoring and visualization platforms to detect dead metrics with no operational value.
- Built logic to correlate metrics with dashboards, alerts, and query activity, enabling accurate identification of unused metrics.
- Developed a custom **Claude Skill** integrated with the **Model Context Protocol (MCP)** to streamline engineering workflows by connecting Claude with internal tools and services.
- Implemented MCP integration to enable efficient context sharing and task execution through the AI assistant.

Tech Stack: Python, Prometheus, Grafana, Kubernetes, VictoriaMetrics, REST API , Model Context Protocol (MCP)

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript (ES6+), SQL, Python, C
- **Frontend:** AngularJS, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, Spring Boot, Spring Core, Spring MVC
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Monitoring:** Prometheus, Grafana
- **Tools & Platforms:** Git, GitHub, VS Code, Linux, Maven

PROJECTS

CodeMate – DSA Preparation & Progress Tracking Platform ([Link](#))

- Developed a centralized DSA preparation platform to help users track coding progress and stay consistent.
- Integrated coding sheets, real-time progress tracking, LeetCode statistics, and profile management in one system.
- Built a responsive full-stack application with secure authentication and scalable backend architecture.

Tech Stack: React, TypeScript, Tailwind CSS, Java, Spring Boot, Spring Security, JWT, PostgreSQL, Maven

Retail Billing System ([Link](#))

- Built a full-stack retail billing application to automate billing, inventory management, and invoice generation.
- Implemented real-time cart updates and automatic stock deduction after checkout.
- Secured user authentication and authorization using JWT and Spring Security.
- Designed a responsive user interface for fast and user-friendly billing operations.

Tech Stack: React (Vite), Java, Spring Boot, Spring Security, PostgreSQL, Hibernate, JPA, JWT, Maven, REST APIs

ACHIEVEMENTS AND HACKATHONS

- Awarded KIIT Merit Scholarship (3rd & 4th Semester) for academic excellence.
- Advanced to Round 2 of Adobe Hackathon 2024 after clearing the Online Assessment among national-level participants.
- Reached Semifinals of Flipkart GRiD 2025, a national-level tech competition, among thousands of applicants.
- Among the top 50 female coders in Amazon HackOn 2026
